FARM PRODUCTION, DISPOSITION, CASH RECEIPTS AND GROSS INCOME FOR TURKEYS
1946 - 47 1/2

Turkey production in 1947 amounted to 34,795,000 birds, the Bureau of Agricultural Economics reports. This was 14 percent less than in 1946 and 1 percent below the 1941-45 average. Production was below that of 1946 in all but 5 States.

California was again the leading State in the production of turkeys, with 4,035,000 birds in 1947, followed by Texas with 3,617,000, Minnesota with 3,523,000, Iowa with 2,560,000 and Oregon with 1,628,000. These 5 States accounted for 44 percent of the turkeys produced in 1947. The West North Central States, the largest producing region in the United States, produced 29 percent of the Nation's turkeys in 1947, the West 27 percent, the South Central and East North Central 13 percent each, the North Atlantic and the South Atlantic 9 percent each.

Turkey Sales Smaller: Turkeys sold in 1947 numbered 36,195,000 birds -- 13 percent less than in 1946. About 6,650,000 of the turkeys sold in 1947 were carried over from the 1946 crop. Of these 1,950,000 were late market birds sold in January and February 1947 and 4,700,000 were breeder hens and toms sold after the breeding season, mostly in April and May. Of the 34,795,000 turkeys produced in 1947, about 1,347,000 late market birds and 3,160,000 breeder hens and toms were carried into 1948.

Prices about the Same: The average price received for turkeys sold in 1947 was 36.3 cents per pound live weight, compared with 36.2 cents in 1946. Although turkey prices in 1947 were below those of 1946 in all months of the year except December, an increase of 4 cents per pound in December, which accounted for 31 percent of the 1947 sales, offset lower prices in all other months of the year.

Cash Receipts are Down: Cash receipts from the sale of 655,282,000 pounds (live weight) of turkey meat in 1947 amounted to \$238,041,000 -- 12 percent less than in 1946. Almost all of this decrease was due to a decrease in the number of pounds sold in 1947.

Market Turkeys Heavier: Market turkeys averaged heavier in 1947 than in 1946 because of the larger proportion of the broad-breasted type of bird. The proportion of broad-breasted birds have been gradually increasing since our records began in 1929 and the average weight per bird sold has increased from 13.2 pounds in 1929 to 18.1 in 1947. Hens averaged 13.8 pounds in 1947, the same as in 1946, while toms averaged 22.4 pounds compared with 22.0 in 1946.

Turkey Marketings: The tendency during the period 1941-46 was toward earlier hatching and earlier marketing of turkeys. In 1947, however, hatchings and marketings were later than in 1946. By the end of November 1947, marketings had almost caught up with those of 1946 -- 69 percent of the market birds had been sold compared with 70 percent sold in 1946.

Death Loss Lightest of Record: Loss of poults in 1947 was the lowest in 11 years of record -- 20.2 percent of those hatched, compared with 21.7 in 1946 and the 1941-45 average of 26.9 percent. Breeder hen losses were the lowest of record -- 7.6 percent compared with 8.3 percent in 1946 and a 5-year average of 10.5 percent.

1/ Prepared by E. Smith Kimball, Paul W. Smith, and Robert F. Moore, Agricultural Statisticians.
